▶ Legal and Law Practice

At courts, the digital pres ryone in the court room can see and examine it in real time. Being able to view and discuss the evidence in real time is a true advantage in court.

▶ Court

▶ Medicare Areas

Using digital presenters, doctors can directly display x-ray films of patients research it in a seminar or take tissue samples from patients and have a specialist hundreds of mile away examine them. The digital document cameras offer a wide depth of field and shadow-free illumination, both of which help doctors obtain clear images.

▶ ID Card Issuing System

The digital presenter is also used to issue an ID card by capturing an image of customers or members. It captures images by scanning an existing photo or directly taking a picture of the customer. Clear image capture, quick image transmission to a PC and easy, flexible image adjustment make this device the most efficient solution for a variety of membership cards issuing applications.
